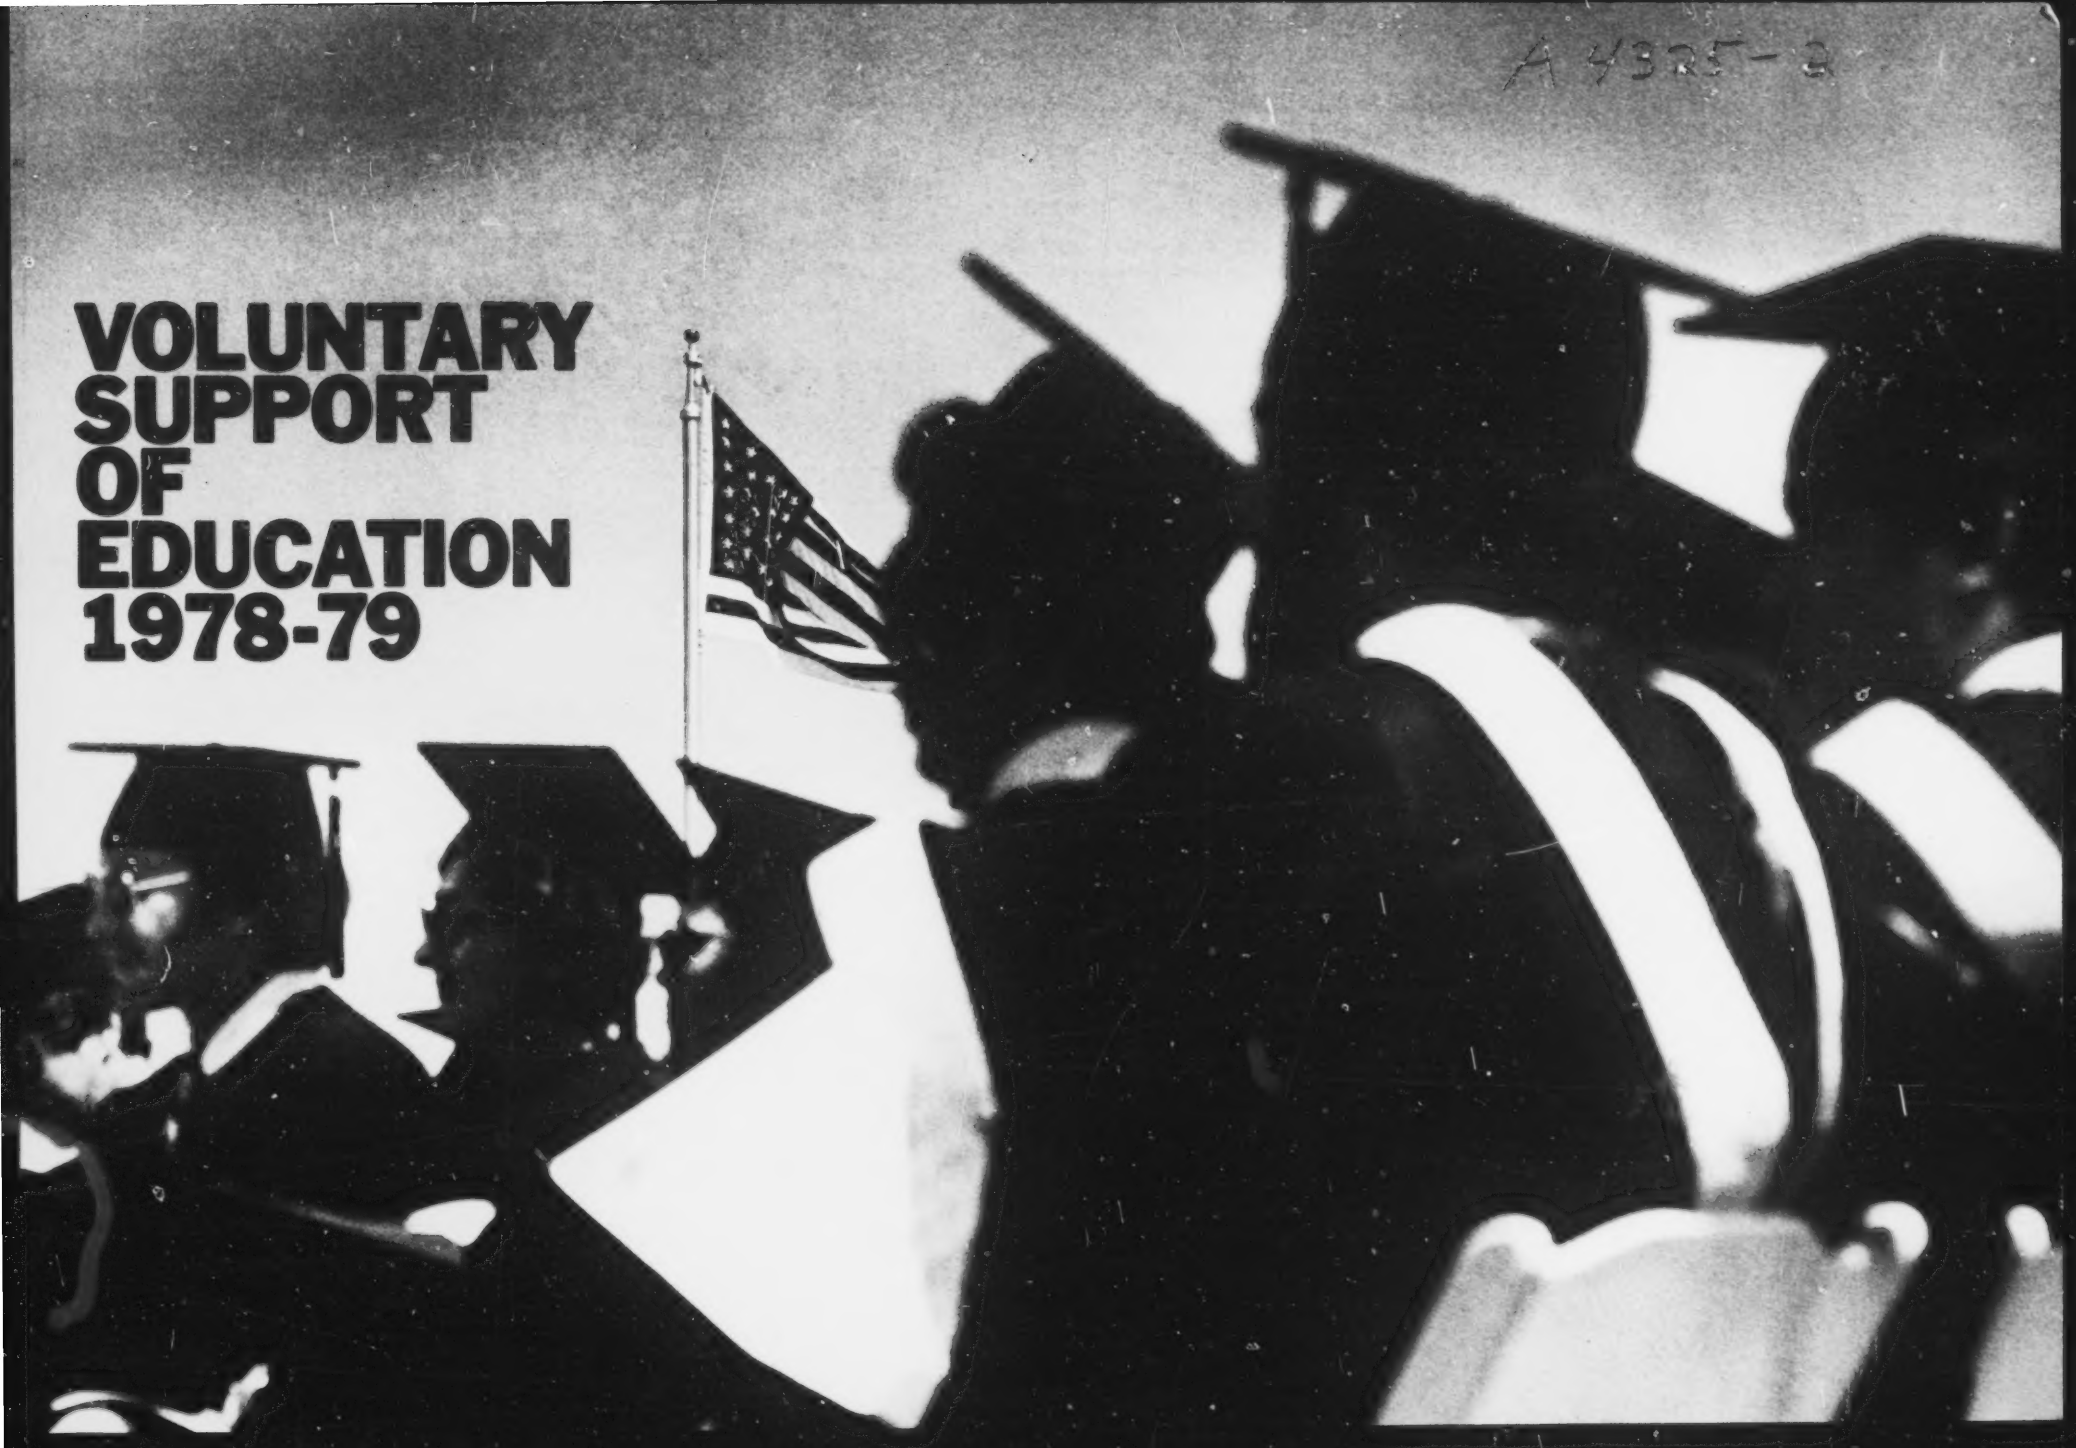
A 4325-8

VOLUNTARY SUPPORT OF EDUCATION 1978-79



Prepared by the Council for Financial Aid to Education and jointly sponsored by the Council for Advancement and Support of Education, the Council for Financial Aid to Education and the National Association of Independent Schools.

Highlights

HIGHER EDUCATION

National Estimates of Voluntary Support of Higher Education indicate that

- Total support rose $190 million in 1978-79 to an estimated $3.23 billion
- Year-to-year growth in total support slowed to 6.3 percent from 13.9 percent in 1977-78
- The rate of inflation was greater in 1978-79 than the increase in total support dollars
- Increases in support were unevenly distributed by types of donors and uses for which funds were designated

Reports from Participating Institutions present a mixed picture

- **73 major private universities** reported receiving contributions of $1 billion, the first time that any single group of institutions has reached this level of voluntary support
- **Changes varied by type of Institution.** The percentage increase in support for public four-year institutions was almost double that for private four-year colleges and universities. Private coeducational colleges experienced a decrease in support, primarily from a drop in large bequests from nonalumni individuals.
- **Changes varied by type of Donor.** Increased alumni support was offset by decreased nonalumni support so that contributions from all individual donors rose a modest 3.5 percent. Bequests and annuities were down 7.7 percent, or $32.6 million, but other gifts by individuals were substantially higher. Corporate support reached a new all-time high as a percentage of total voluntary support.
- **Changes varied by type of Purpose.** Unrestricted funds grew more rapidly than those earmarked for specific uses and were almost a third of all contributions. Student aid dollars decreased. Support for "other" purposes increased more than for all specified purposes. Support for current operations rose 10.4 percent; support for capital purposes showed almost no change.

PRIVATE SECONDARY AND ELEMENTARY SCHOOLS

Voluntary support of Independent Schools increased modestly

- Average support for all institutions rose only 3.1 percent
- Support for the 282 schools reporting in both 1977-78 and 1978-79 grew by 8.6 percent
- Percentage changes varied widely both up and down and by donor type and purpose

A grant from the Reader's Digest Foundation assisted CFAE in meeting the costs of producing this Survey.

May 1980

PREFACE

This twentieth *Survey of Voluntary Support of Education* has been jointly sponsored by the Council for Financial Aid to Education, the Council for Advancement and Support of Education, and the National Association of Independent Schools, with the cooperation of several other national organizations. It is the latest in a series of studies of educational philanthropy dating from 1954-55.

The definitions used in the 1978-79 survey are the same as those used in 1977-78 and prior years. Voluntary support, as defined in *Gift Reporting Standards*, excludes income from endowment and other invested funds as well as all support received from federal, state, and local governments and their agencies; in editing the survey questionnaires, CFAE deleted all income from these sources when so identified by the reporting institution. Any enrollment figures not supplied by the colleges and universities were taken from the *Education Directory*, 1978-79, published by the U.S. Department of Health, Education, and Welfare, National Center for Education Statistics.

Since 1965-66, the survey information has been processed by electronic computer, and most of the data supplied by the participating institutions have been stored on magnetic tape. The ready availability of this store of information makes it possible to undertake supplementary studies of educational philanthropy.

Back issues of the printed reports for the years since 1971-72 are available from the Council for Financial Aid to Education. The reports for all survey years prior to 1971-72 are now available on microfiche in complete sets, and may be obtained from the Council for Advancement and Support of Education.

Overall participation in this survey was lower than that of the last several years, although the participation rates of the four-year colleges and the independent schools have remained relatively stable. The following table summarizes participation in 1978-79.

	Four-Year Colleges and Universities	*Two-Year Colleges*	*Private Precollege Schools*	*Total*
INVITED TO PARTICIPATE	1,580	627	779	2,986
COMPLETED AND TABULATED QUESTIONNAIRES	882	90	368	1,340
NOT TABULATED:				
UNABLE TO PARTICIPATE	5	2	—	7
NO SUPPORT	2	16	—	18
REPORTING TOO LATE OR IN TOTALS ONLY	12	2	7	21
TOTAL RESPONSE	901	110	375	1,386
RESPONSE RATE	57%	18%	48%	46%
TOTAL AMOUNT TABULATED	$2,537,821,969	$18,173,311	$157,526,343	$2,713,521,623
TOO LATE OR IN TOTAL ONLY	$ 32,768,659	$ 1,214,159	$ 1,692,680	$ 35,675,498
TOTAL AMOUNT REPORTED	$2,570,590,628	$19,387,470	$159,219,023	$2,749,197,121

To all those who filled out the questionnaires, to the institutions they represent, and to the cooperating associations in the educational community, CASE, CFAE, and NAIS express their gratitude.

Higher Education

PART I. NATIONAL ESTIMATES

- Total voluntary support rose $190 million in 1978-79 to an estimated $3.23 billion
- Year-to-year growth in total support slowed to 6.3 percent from 13.9 percent in 1977-78
- The rate of inflation was greater in 1978-79 than the increase in total support dollars
- Increases in support were unevenly distributed by both source and purpose

Growth in voluntary support of higher education slowed to a modest 6.3 percent in 1978-79 after three years of double-digit rises. Total support reached an estimated $3.23 billion, a gain of $190 million over the previous year, following yearly increases of between $250 million and $370 million since 1974-75. This slowdown meant that contributions to higher education did not keep up with inflation in this latest year, although they have outstripped it in the four-year period since 1974-75, whether measured by the Consumer Price Index (CPI) or the Higher Education Price Index (HEPI). In terms of real purchasing power for the higher education dollar (HEPI), voluntary support declined 1.4 percent in 1978-79 but increased by 14 percent over the four years since 1974-75.

In a further break with the patterns of most recent years, all types of donors did not contribute equally to the augmented support (see Table 1). Foundations accounted for the largest percentage gain in contributions seen in 1978-79 and also increased their proportional share of total support, reversing a downward trend begun in 1974-75. Business corporations increased their higher education support above the overall rate in each of the last four years. Indeed in 1978-79 their support reached a new all-time high as a percentage of voluntary support. This may be a signal of spreading commitment to the future financial health of higher education. Alumni also increased their gifts more than the overall

increase in 1978-79 and have outstripped the growth of all other donor groups in the four-year period. Giving by nonalumni individuals, however, decreased from last year's very high level, although its four-year growth is not significantly lower than that for total support during the period.

The purposes for which contributions were made also evidenced unusual patterns of change. For the first time in several years support for student aid decreased, and its four-year rise was slower than the four-year growth in total support. Contributions for physical plant have expanded more slowly than those for any other purpose, presumably because of relatively stable enrollment. Although unrestricted funds grew faster in 1978-79 than all designated funds as a group, those donated for "other" purposes than plant, research, student aid, and faculty compensation rose dramatically year to year and cumulatively.

Contributions earmarked for current operations outweighed those for capital purposes in 1978-79 and constituted almost two-thirds of all voluntary support received by higher education institutions. Support for capital purposes, however, has grown slightly faster than current support in the four years since 1974-75. Since support for physical plant has increased slowly, it is probable that much of the growing support for capital purposes has been going into endowment.

It is not possible to estimate dollar contributions to various classes of institutions, but it is possible to derive patterns of change, using institutions participating for two consecutive years in each of the last several CFAE surveys. The results are shown in Table 2.

Several interesting growth patterns emerge. The first is the high rate of increase in voluntary support for the public institutions versus the private institutions. Of interest also is the very high rate of growth for the professional and specialized schools. Most of this resulted from unusually large donations to two institutions in both 1975-76 and 1978-79 in a group of relatively small size. In contrast the rise in support for two-year colleges has been below that for all other institutions and exhibits an uneven pattern of change over the four years. The extraordinary growth experienced by the private men's colleges must be viewed in the context of the extremely small size of the sample and the fact that the large rise in 1977-78 occurred in a single institution.

Economic Factors and Long-Term Perspective

The most significant factor affecting levels of voluntary

* *Technical Notes: Each of the percentages shown in the first four columns of this table reflects the year-to-year change in total voluntary support for a core group of institutions that participated in the Survey of Voluntary Support of Education in both of the two years indicated; the figures in parentheses are the numbers of institutions in these groups. The four-year percentage changes shown in the right-hand column were obtained by linking the four year-to-year changes for each class of institution.*

The reliability of these estimates of the percentage change in voluntary support between 1974-75 and 1978-79 varies from one class of institution to another. In general, the larger the number of institutions in each year's core group in relation to the total number of institutions in that class, the more reliable the estimate.

support in the last several years has been the accelerating rate of inflation. Yet little is known about how inflation actually affects the motivation or the behavior of donors. Examining some of the giving patterns of donors in response to inflation that reached double-digit rates by the middle of 1979 might provide some insight into possible future trends in voluntary support of higher education.

One measure of the capacity of donors to give is the level of their income. For example, personal income determines how much individuals can give. Corporate pretax net income influences the amount of money businesses have available for educational philanthropy, although there may be a lag between the time profits are realized and the time donations are planned and made. In the absence of more precise measures, return on assets in the form of dividend and interest income provides a rough measure of the funds foundations can distribute. Comparison of trends in these measures with patterns of giving by the various types of donors may provide clues to the relation of voluntary support and inflation.

Personal income rose 12 percent in 1978-79; during this period support from individual donors, exclusive of bequests and deferred gifts, increased approximately 10 percent. Corporate pretax net profits were up 16.3 percent in 1977-78 and 15.1 percent in 1978-79, and corporate contributions rose 13.9 percent in 1977-78 and 9.4 percent in 1978-79. Foundation grants increased by 12.5 percent in the face of a 15.4 percent rise in dividend and interest income. The inflation rate in 1978-79 (CPI) was 9.5 percent, which is less than the rates of increase in these components of income and the respective amounts of educational support from these three donor groups.

In 1978-79, therefore, the actual increases in incomes were greater than the increases in support of higher education, and both were ahead of inflation. This may indicate that one of the impacts of inflation might be that donors are unwilling to increase their contributions in proportion to the increases in their incomes. The experience of one year, however, is not enough on which to make a generalization.

Educational institutions, on the other hand, were subject to certain constraints that were not directly related to levels of voluntary support. After the great expansion of the late 1960s and early 1970s, enrollment growth slowed considerably and is expected to assume a steady state for the next few years. Institutional expenditures, however, have been increasing, driven

Table 3. *Voluntary Support of Higher Education in Relation to Enrollment, Inflation, and Educational Costs*

				Institutional Expenditures			Estimated Voluntary Support

1974-75 to 1978-79	2.5	7.5	6.9	8.6	5.9	– 1.5	10.6	8.0	0.6	

up by inflation rather than by greater numbers of students. Paradoxically, although expenditures per student in current dollars have been increasing since 1965, they have actually decreased when adjusted for inflation (see Table 3).

The importance of voluntary support to education is illuminated by looking at its relation to institutional expenditures. Between 1949-50 and 1965-66 total institutional expenditures increased at the same rate as did voluntary support, but in the next five years the growth of institutional expenditures accelerated while voluntary support greatly slowed its growth and began to account for a much lower share of institutional disbursements. Between 1970-71 and 1974-75 the expansion of institutional spending slowed somewhat, while growth in voluntary support became minimal and led to a further decline in its importance to institutional budgets. Per student figures for both expenditures and support, adjusted for inflation, highlight these changes; both decreased during this period. Between 1974-75 and 1978-79 the picture changed considerably. Institutional expenditures grew even more slowly, the growth rate of voluntary support increased sharply, and voluntary support accounted for a slightly larger share of institutional expenditures.

Changes in institutional expenditures are independent of changes in the patterns of voluntary support. Voluntary support responds primarily to trends in economic activity; institutional expenditures are determined by enrollment patterns, real costs per student, and pressures from inflation on the components of institutional budgets.

Higher education will continue to need voluntary support in ever increasing amounts. Inflation will exert strong upward pressures on institutional budgets in a period of stable or even declining enrollment. Public support, particularly at the federal level, is expected to grow more sluggishly than in the recent past. The private sector will have to fill the gap between expanding needs and tighter sources of funds if the vitality of the higher education system is to be preserved.

In these difficult times it will be increasingly important for donors to recognize the expanding needs of higher education institutions for voluntary support and for the institutions themselves to carry this message to their donors in effective and persuasive ways.

Higher Education

PART II. SURVEY RESULTS

A. For 819 Institutions Reporting in 1977-78 and 1978-79:

- Total support grew 6.1 percent, in contrast to the 13.3 percent gain reported for 1977-78 over 1976-77
- The percentage increase in support for public four-year institutions was almost double that for private four-year colleges and universities
- Private coeducational colleges experienced a decrease in support, in large part because of a decrease in bequests by nonalumni individuals
- Student aid received fewer dollars

B. For All Institutions Reporting in 1978-79:

- Average support per institution rose from $2.205 million in 1977-78 to $2.630 million in 1978-79
- Nonalumni giving decreased, but foundations gave more
- Bequests declined $27.5 million, mostly affecting the private coeducational colleges

A. 819 Institutions Reporting in Both Surveys

Year-to-year changes are most meaningful when analyzed for the same institutions participating in two consecutive surveys. There were 819 institutions reporting in both 1977-78 and 1978-79.

By Type of Institution

Year-to-year changes in amount of support varied considerably by type of institution (see Table 4). The percentage increase in support for public institutions was double that for private four-year institutions as a group and was exceeded only by that for the professional and specialized schools. Public institutions experienced an overall 11.5 percent increase in donations from foundations, corporations, and alumni, groups that accounted for two-thirds of their total support. Most of the gain in support for the professional and specialized schools was accounted for by large increases at two institutions. The private coeducational colleges, recipients of several large bequests from nonalumni individuals in 1977-78, experienced a decrease in support in 1978-79, the first significant reduction seen by any group of institutions since 1974-75, when all classes of private colleges reported declines. It should be noted that the decrease in contributions for private men's colleges was distorted by one large bequest to a single institution in 1977-78.

Table 4. *Total Voluntary Support by Type of Institution, 819 Colleges and Universities in Two Surveys* (000 omitted)

	No.	*1977-78*	*1978-79*	*% Change*
MAJOR PRIVATE UNIVERSITIES	70	$ 894,123	$ 969,353	+ 8.4

By Source

Table 5 shows that contributions from nonalumni individuals decreased in 1978-79, the first such decrease since 1974-75. This drop was concentrated in large declines in support of the men's, women's, and coeducational colleges. Virtually all of it can be accounted for by the 8.5 percent decrease in nonalumni bequests.

In contrast, alumni contributions grew at almost double the percentage rate of increase for all sources combined. Much of this was due to large increases reported by a few major private and large state universities, as well as by one professional school. Alumni at the private coeducational colleges raised their gifts minimally; the two-year colleges received less alumni support than in 1977-78.

Both corporations and foundations increased giving at higher rates than the overall increase, and by and large they chose the same types of institutions as recipients. Foundations distributed almost half of their contributions to the major private universities and divided most of the rest of their contributions between public institutions and private coeducational colleges, with the former getting the larger share. Corporations, on the other hand, gave three-fifths of their support to private institutions and two-fifths to public ones. Contributions to the major private universities and the public institutions each rose about 8.5 percent, whereas gifts to the private four-year colleges (men's, women's, coeducational, and professional), comprising about a fourth of total corporate support, increased by 19.6 percent.

Although foundations and corporations tend to concentrate their support rather narrowly on the major private universities and the large public institutions, individuals, both alumni and nonalumni, spread their gifts across the spectrum.

Overall, alumni, nonalumni individuals, foundations, and business corporations provided about 87 percent of the total voluntary support received by higher education in both 1977-78 and 1978-79 (as seen in Chart 2). This relationship has remained stable in the survey reports for several years.

By Purpose

When contributions are examined according to intended uses, as in Table 6, an uneven pattern of growth emerges. Support for student aid was the only category which decreased. Almost two-thirds of this decline occurred at private coeducational, professional and specialized, and public institutions. On the other hand, unrestricted support increased. Indeed, the rate of increase for unrestricted funds was almost twice that for funds for all restricted purposes combined. This change was especially evident at the public institutions.

Almost half of the increased support for physical plant was given to the major private universities. Funds for physical plant were down 13.5 percent for the public institutions. The major private universities and the public institutions together received 93.9 percent of the total contributions for research, even though the funds going to the public institutions declined 4.5 percent in 1978-79, while those for the major private institutions rose 8.9 percent.

The division of support among the various purposes has been relatively stable for several years. Chart 3 shows this pattern for 1978-79 and 1977-78.

The 819 institutions reporting for 1977-78 and 1978-79 indicated that more than half of the support they received went for current operations and that this support increased by 10.4 percent whereas support for capital purposes was only marginally higher than in 1977-78. In light of the fact that the increase in funds for physical plant was lower than the overall growth in total support, it is probable that much of the increase in capital support went into endowment.

Table 6. ***Total Voluntary Support by Purpose, 819 Colleges and Universities in Two Surveys*** *(000 omitted)*

* *Figures shown differ slightly from those published in the 1977-78 survey report: 9 institutions have been reclassified, and the amount of support reported by them in 1977-78 has been allocated to the class in which they reported in 1978-79.*

B. All Institutions Reporting in 1978-79

The most striking thing about the total survey results shown in Table 7 is the fact that for the first time one single group of institutions reported receiving $1 billion in contributions. These 73 major private institutions received almost 40 percent of all the private donations to higher education reported for 1978-79. In contrast, almost three times as many public four-year institutions reported support of about three-quarters of a billion dollars, and six times as many coeducational colleges garnered not quite two-thirds as much.

These differences become even more apparent when average support per institution is compared rather than total dollar figures. At the same time it should be noted that the composition of each of the groups of institutions varies slightly from year to year, a factor which can distort the averages slightly.

As might be expected, Table 7 shows that the major private universities lead all other types of institutions in average amount of support per institution. At the same time average support for public institutions, although only one-fourth the size of that for the major private universities, seems to be growing rapidly. Since the participation rate for public institutions is relatively low, the experiences of those reporting may not be representative of all public institutions. The average support for these 214 institutions, however, is about the same as that for the private men's colleges and well above that for the other classes of private institutions.

Changes in average support for two groups of institutions need further explanation. The increase in average support for the professional and specialized schools is somewhat distorted by the fact that much of it is accounted for by large gifts to two institutions. Likewise, much of the seemingly precipitous jump in average support of the two-year colleges results from the fact that many of the institutions reporting in 1977-78 but not in 1978-79 had reported relatively low support, which depressed the average in 1977-78. Indeed, Appendix Table C reveals that average support for the two-year institutions in 1975-76 and 1976-77 was $180,000 and $173,000 respectively. These figures offer a better benchmark against which to measure the 1978-79 results.

Technical Notes:

A. In the listing on the following pages, Column 22 does not purport to show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

B. In some instances the number of institutions listed is greater than the number tabulated, for three reasons: (1) some multicampus institutions are shown in summary as well as in detail, (2) some of the component professional schools of major institutions are also listed separately, and (3) a few of the institutions not supplying complete information or reporting too late for computer tabulation are listed.

C. There were 46 institutions responding to the Survey invitation which are omitted from the tabulated data. These institutions include those which (1) were unable to supply any information, (2) received no support, (3) were unable to supply complete information, or (4) reported too late for computer tabulation. These institutions are listed separately on page 58.

By Source

Alumni and nonalumni individuals continued to contribute the greatest share of voluntary support to higher education, with foundations coming in a close third in 1978-79 (see Table 8). Corporate support reached an all-time high of 17.2 percent of total voluntary support.

Corporate support through employee matching-gift programs also showed significant gains in 1978-79. There was an 18.8 percent increase in the number of gifts matched and a rise of 8.7 percent in the size of the average match per gift, resulting in a 29.1 percent increase in the dollar amount of corporate support given through these programs. At $27.1 million corporate matching gifts accounted for 6.2 percent of total corporate support reported by the institutions participating in the 1978-79 survey, which compares with 5.4 percent in the 1977-78 survey. The rise in this form of corporate giving reflects a continued growth in the number of companies having such programs, the extension of eligibility to participate to outside directors and retirees, and a rise in the popularity of the multiple match.

As stated earlier, the small decrease in nonalumni individual gifts is due in great part to a drop of $25.7 million in bequests. As a result bequests as a percentage of support by individuals fell to a ten-year low in 1978-79. Deferred giving was also down in dollar amounts and as a percentage of support from individual donors. Both of these patterns are reflected in Table 9. Because of their nature, these two types of giving have random characteristics that are evident in the wide variations in their percentages of individuals' support over the years.

By Purpose

Over two-thirds of the support received by institutions of higher education was given for specific purposes. This pattern was much the same in both 1977-78 and 1978-79 despite differences in the number of institutions reporting each year. Likewise, the distribution of monies among the various purposes was quite similar in the two years, with two interesting differences. The proportion of funds given for student aid declined and that for "other" purposes, not defined in the CFAE questionnaire or in the participants' responses, increased. Evidently, institutions are asking for, and donors are giving, funds for a different set of purposes from that defined in the past (namely, physical plant, research, student aid, faculty compensation). In general, however, the proportional share of all types of purposes as well as of unrestricted funds has remained fairly stable over the last few years, although a slight increase in the percentage of unrestricted gifts to total support was reported in 1978-79. See Appendix Table E for a ten-year summary of the allocations of voluntary support by purpose.

More interesting, however, was the changed relationship between contributions for current operations vis-à-vis capital purposes. The share of funds going toward current operations increased in 1978-79 after having decreased in the previous three years. (Details of the support for each of these purposes by type of institution in 1978-79 can be seen in Appendix Table A.) This implies that donors may have become more sensitive to college and university needs for operating funds than in the past.

The Annual Fund

Since alumni contributions are a major source of voluntary support, it is useful to examine the details of annual fund support, which is an important channel for alumni gifts (see Table 10). As can be seen, average annual gifts have been rising steadily since 1970-71, despite recessions and economic uncertainties. Indeed, the 16.4 percent increase in size of the average gift in 1978-79 was greater than the rate of inflation. The participation rate in the 1970s, however, has been somewhat stable at levels that have never approached those of the late 1960s (nor that of the private secondary schools).

Table 11 indicates some of the differential alumni loyalties by type of institution. Alumni of single-sex institutions respond more heavily to appeals and usually contribute larger average amounts than those of coeducational institutions, whereas alumni of the major private universities give very large average gifts but respond in modest proportions. Alumni of private institutions contribute more to their alma maters than do those from public institutions. The overall averages for rate of response and average gift are lowered by the lack of participation of two-year college alumni.

Private Secondary and Elementary Schools

THE SURVEY RESULTS

- 368 institutions reported $157.5 million support in 1978-79, while 367 reported $152.4 million in 1977-78; average support per institution rose only 3.1 percent from $415,274 to $428,061
- 282 institutions participating in both surveys reported an increase of 8.6 percent, not enough to keep up with inflation
- Percentage changes varied widely by donor type and purpose

The 368 institutions responding to the 1978-79 survey reported total gifts of $157.5 million. Average support for each of these schools was $428,061, only about $13,000 larger than the average reported by the 367 institutions participating in 1977-78. Although the numbers of institutions are similar, the composition of the groups is quite different. It is therefore more useful to analyze year-to-year changes in those institutions participating in both surveys.

There were 282 institutions reporting results in both 1977-78 and 1978-79. Comparison of their figures presents a mixed picture. Total support increased by 8.6 percent, not enough to offset the 9.5 percent rise in the Consumer Price Index. Donor giving patterns fluctuated considerably. Alumni contributions, which comprise approximately a third of the schools' voluntary support, were almost flat, while gifts from nonalumni individuals, comprising about another third of their total funds, rose 16.4 percent. Corporations increased their contributions by an astounding 32.4 percent, but they only provided about 3 percent of the total amount received.

Bequests and deferred gifts decreased from last year's exaggerated peak occasioned by one large bequest and accounted for a more normal 8.9 percent of total support. Alumni-fund solicitations continued to improve their effectiveness, achieving a record 25.9 percent rate of response, and the average gift rose to a new high of $95.43 (up 8.3 percent). The 11.1 percent rise in alumni-fund gifts, however, was only sufficient to keep total alumni gifts about even with last year.

Over half of the funds contributed to these 282 schools were for unrestricted purposes, and they rose by 4.3 percent. Almost a quarter of the total support was for physical plant, and it showed an 11.7 percent increase, a greater rise than for any other purpose. Gifts for capital purposes were more than twice those for current operations, a fairly consistent pattern for these schools in the last three years. On the other hand, funds for student aid and faculty compensation, which together account for only 15 percent of all contributions, were down 4.3 percent.

Note: The year-to-year changes shown in this table are not all of equal significance. The total amount reported by any one class of institution from any one class of donor is subject to erratic behavior due to major fund-raising drives, the timing of corporate and foundation programs, large bequests and other non-recurring influences. This is particularly true of the smaller groups of institutions and the smaller dollar figures.

*In every Survey, each institution is classified in the category appropriate to its status in that year. Since the status of many institutions has changed over the years, the data by category is not strictly comparable from one Survey to another. See Page 10 for a comparison of 1977-78 and 1978-79 data on an adjusted basis.
